

STUDENT ADVISORY BOARD

131 W Myrtle St, Boise | 208.343.9895 | dcidaho.org

WHO

Student leaders age 13-18 in the Treasure Valley wishing to provide insight and ideas for STEAM programming through the Discovery Center of Idaho. Groups will meet directly with Discovery Center Education staff as well as provide information and feedback for quarterly Education Advisory Council meetings.

WHEN

Sessions will begin in September and will take place monthly throughout the school year. We hope to hold initial meetings at schools during school hours with a select group of students, some via recommendations from teachers and/or guidance counselors and some recruited through external organizations.

WHY

The ultimate goal is to bring representatives from a variety of different schools together to collaborate and advise on current and future program offerings to support STEAM interest in traditionally underrepresented populations, eventually leading to increased participation in STEAM-related career pathways.

HOW

We need your help! Including the right individuals in this process is essential to its success, so if you are able to connect us with students wishing to participate more fully in bringing STEAM learning to others, please share this opportunity! We plan to continue this program for multiple school years; students with a growth mindset, a willingness to share input and work with others to develop long-term solutions are welcome to apply!

WANT TO JOIN?

To confirm your interest in this program, or for help with additional questions and more information, please reach out via email to e.seymour@dcidaho.org
